Everyday AI lesson

AI for photos and memories

About 5 minutes to read | Full lesson:
https://everydayai.careercalling.com.au/lessons/photos-and-memories/

AI can sharpen a faded photo, help you write captions for an album, or turn your memories into a short family history. These can be lovely projects. A little care keeps them safe and honest.

Remember

- AI can help restore photos, write captions and record family stories.
- AI restoration guesses details and can change faces. Keep the original.
- Label edited pictures as edited.
- Ask before uploading photos of other people, especially children.
- Check what face-photo apps do with your pictures before using them.

Try this

1. Pick one family photo you love.
2. Write two or three sentences about it: who, where, when and why it matters.
3. Ask a chatbot to suggest five questions that would help you add more to the story.

Safety tip. Keep the original of every photo you change, and say clearly when a picture has been edited by AI.
